

NexaCare Admin Guide

Adding new email accounts and enabling IMAP

This guide is for the NexaCare account administrator. It covers how to add a new user account via the Zoho Mail admin panel in a browser, and via the Zoho Mail Admin mobile app. Always remember to enable IMAP for each new user — without this they cannot add the account to their phone.

Useful Links

Admin panel (browser)	Zoho Admin app (mobile)
<code>mailadmin.zoho.eu</code>	Search "Zoho Mail Admin" in App Store / Google Play

Adding a New User — Browser

Step 1

Go to **mailadmin.zoho.eu** and log in with your admin credentials.

Step 2

Click **Users** in the left sidebar.

Step 3

Click **+ Add User** (top right).

Step 4

Fill in the new user's details:

First name, Last name, Email address (e.g. john@nexacare.ie), and a temporary password.

Note the temporary password — you'll need to give it to the new user.

Step 5

Click **Add User** to create the account.

Enabling IMAP — Browser

Do this immediately after creating the account — the user cannot add email to their phone until IMAP is enabled.

Step 1

In the admin panel, click **Users** in the left sidebar.

Step 2

Click the new user's name to open their profile.

Step 3

Click **Mailbox Settings** in the left menu within their profile.

Step 4

Select **Email Client Access** (or **IMAP/POP** depending on your Zoho version).

Step 5

Toggle **IMAP Access** to **Enabled**.

Step 6

Click **Save**. IMAP is now active for this user.

Adding a New User — Zoho Mail Admin App

Install the **Zoho Mail Admin** app from the App Store (iPhone) or Google Play (Android) and log in with your admin account.

Step 1

Open the **Zoho Mail Admin** app and log in.

Step 2

Tap **Users** from the main menu.

Step 3

Tap the **+** (**Add**) button.

Step 4

Enter the new user's first name, last name, email address, and a temporary password.

Step 5

Tap **Add User** to create the account.

Enabling IMAP — Zoho Mail Admin App

Do this immediately after creating the account.

Step 1

In the Zoho Mail Admin app, tap **Users**.

Step 2

Tap the new user's name to open their profile.

Step 3

Scroll down to find **Mail Settings** or **Email Client Access**.

Step 4

Tap **IMAP Access** and toggle it to **Enabled**.

Step 5

Tap **Save**. The user can now add the account to their phone.

Checklist — Every New User

- Create account in Zoho admin panel
- Note down the temporary password
- Enable IMAP for the new user
- Give the user the temporary password and the User Setup Guide
- Ask them to change their password on first login

Remember: you can have up to 5 users on the current Zoho Mail Lite plan.
