

# NexaCare Email Setup Guide

How to add your company email to iPhone or Android

## Server Settings

| Your email address      | Incoming (IMAP) server | Outgoing (SMTP) server |
|-------------------------|------------------------|------------------------|
| kevinholmes@nexacare.ie | imappro.zoho.eu        | smtp.zoho.eu           |
| IMAP Port               | SMTP Port              | Security               |
| 993                     | 465                    | SSL/TLS                |

## iPhone Setup

### Step 1

Open **Settings** on your iPhone.

### Step 2

Scroll down and tap **Apps**, then tap **Mail**.

### Step 3

Tap **Mail Accounts**, then tap **Add Account**.

### Step 4

Tap **Other** at the bottom of the list.

### Step 5

Tap **Add Mail Account** and fill in your details:

Name: Kevin Holmes Email: kevinholmes@nexacare.ie

Password: (your Zoho password) Description: NexaCare

### Step 6

Tap **Next**. Make sure **IMAP** is selected at the top.

### Step 7

Under **Incoming Mail Server** enter:

Host: imappro.zoho.eu Username: kevinholmes@nexacare.ie Password: (your Zoho password)

### Step 8

Under **Outgoing Mail Server** enter:

Host: smtp.zoho.eu Username: kevinholmes@nexacare.ie Password: (your Zoho password)

### Step 9

Tap **Next** — iPhone will verify the settings. Tap **Save** when done.

## Android Setup (Gmail app)

### Step 1

Open the **Gmail** app on your Android phone.

### Step 2

Tap your **profile picture** (top right corner), then tap **Add another account**.

### Step 3

Choose **Other** from the list of account types.

#### Step 4

Enter your email address: **kevinholmes@nexacare.ie** and tap **Next**.

#### Step 5

Choose **Personal (IMAP)** when asked for account type.

#### Step 6

Enter your Zoho password and tap **Next**.

#### Step 7

On the **Incoming server settings** screen set:

Server: **imappro.zoho.eu** Port: **993** Security: **SSL/TLS**

Tap **Next**.

#### Step 8

On the **Outgoing server settings** screen set:

Server: **smtp.zoho.eu** Port: **465** Security: **SSL/TLS**

Tap **Next**.

#### Step 9

Choose your sync preferences and tap **Next**, then **Done**.

---

*Having trouble? Make sure IMAP is enabled in your Zoho Mail account settings before adding the account to your phone. Log into [mail.zoho.eu](mailto:mail.zoho.eu) → Settings → Mail Accounts → IMAP Access → Enable.*
