

NexaCare Email Setup Guide

Setting up your company email on iPhone and Android

You have been set up with a NexaCare email account. This guide will walk you through adding it to your phone and changing your password on first login.

Your Account Details

Email address	Temporary password
_____@nex acare.ie	_____

Your administrator will fill in the above before handing you this guide.

Server Settings

Incoming (IMAP) server	Outgoing (SMTP) server	Ports	Security
imappro.zoho.eu	smtp.zoho.eu	IMAP: 993 SMTP: 465	SSL/TLS

Step 1: Change Your Password First

Before adding the account to your phone, log in on a browser and change your password from the temporary one provided.

Step 1

On your phone or computer, open a browser and go to **mail.zoho.eu**

Step 2

Log in with your email address and the temporary password provided above.

Step 3

Click your **profile initial** (top right corner) and select **My Account**.

Step 4

Go to **Security** → **Change Password**.

Step 5

Enter your current (temporary) password, then enter and confirm your new password.

Step 6

Click **Save**. Use your new password for all steps below.

iPhone Setup

Step 1

Open **Settings** on your iPhone.

Step 2

Scroll down and tap **Apps**, then tap **Mail**.

Step 3

Tap **Mail Accounts**, then tap **Add Account**.

Step 4

Tap **Other** at the bottom of the list.

Step 5

Tap **Add Mail Account** and fill in your details:

Name: Your full name Email: your@nexacare.ie

Password: your new password Description: NexaCare

Step 6

Tap **Next**. Make sure **IMAP** is selected at the top.

Step 7

Under **Incoming Mail Server**:

Host: imappro.zoho.eu Username: your@nexacare.ie Password: your new password

Step 8

Under **Outgoing Mail Server**:

Host: smtp.zoho.eu Username: your@nexacare.ie Password: your new password

Step 9

Tap **Next** — iPhone will verify the settings. Tap **Save** when done.

Android Setup (Gmail app)

Step 1

Open the **Gmail** app on your Android phone.

Step 2

Tap your **profile picture** (top right corner), then tap **Add another account**.

Step 3

Choose **Other** from the list of account types.

Step 4

Enter your email address (your@nexacare.ie) and tap **Next**.

Step 5

Choose **Personal (IMAP)** when asked for account type.

Step 6

Enter your new password and tap **Next**.

Step 7

On the **Incoming server settings** screen:

Server: imappro.zoho.eu Port: 993 Security: SSL/TLS — tap **Next**.

Step 8

On the **Outgoing server settings** screen:

Server: smtp.zoho.eu Port: 465 Security: SSL/TLS — tap **Next**.

Step 9

Choose your sync preferences, tap **Next**, then **Done**.

Having trouble? Contact your administrator. Make sure you have changed your password before trying to add the account to your phone.
